

## Joey Yu Shi

3<sup>rd</sup> year, Combined Honours Mathematics and Computer Science

604-704-5565

joeyshi12@hotmail.com

<https://github.com/joeyshi12>

<https://joeyshi.tech/>

### Technical Skills

<b>Programming:</b>	Python, Java, C++, C, Racket
<b>Tools/Environments:</b>	Git, Atom, MATLAB, Jupyter Notebook
<b>Testing:</b>	Unit testing
<b>Markup languages:</b>	HTML, LaTeX
<b>Libraries:</b>	Numpy, Matplotlib, Scikit-learn, Pandas

### Personal Projects

December 2019 –  
January 2020

<b>Project:</b>	Differential Equation Solver
<b>Technologies:</b>	Python
<ul style="list-style-type: none"><li>- Created class structure for multiple different types of equations using object-oriented techniques</li><li>- Implemented functions that solves and visualizes differential equations by using numerical methods learned in-class</li><li>- Designed GUI by using the standard Python interface: Tkinter</li></ul>	

September 2019 –  
November 2019

<b>Project:</b>	Pet Blob
<b>Technologies:</b>	Java, Android Studio, Reaper, Piskel
<ul style="list-style-type: none"><li>- Designed Android app game about nurturing a personal pet blob using Android Studio</li><li>- Designed inventory system and pet status system using object-oriented programming</li><li>- Created music and animation for background</li></ul>	

### Academic Projects

January 2020 –  
February 2020

<b>Project:</b>	Image Mesher
<b>Technologies:</b>	C++, FTP, SSH
<ul style="list-style-type: none"><li>- Created GridList data type using a doubly linked list</li><li>- GridList represents an image by partitioning the image into blocks of pixels which are stored in GridNodes</li><li>- Implemented functions for creating different meshes between two images by manipulating their respected GridNode pointers</li></ul>	

February 2020 –  
March 2020

**Project:** Border Fill

**Technologies:** C++, FTP, SSH

- Implemented colour picker class for detecting edges along an image
- Applied depth-first search and breadth-first search algorithm to create a flood-fill function to colour the borders of images

### Hackathons

January 2020

**Name:** NWHacks

**Project:** Bananos

**Technologies:** Java, Android Studio

- Created grocery optimization tool by comparing item prices between selected stores
- Implemented voice recognition using Android Speech API
- Developed functions for parsing speech for item names and quantity

### Education

**University of British Columbia**

- Bachelor of Combined Honours Mathematics and Computer Science
- Cumulative GPA: 4.33

### Work Experience

November 2016 –  
June 2018

**Position:** Line Cook

**Company:** Earls

- Executed dishes to Earls' standard
- Maintain a neat and sanitary workstation
- Prepared and portioned food
- Washed dishes and equipment

### Volunteer Work

September 2016 –  
June 2018

**Position:** Computer Lab Monitor

**Company:** Fraser Heights Secondary

- Managed booking of lab equipment for students and teachers
- Supervised the computer lab during lunch-time hours

### Interests

Mathematics,  
Programming,

Music composition,  
Speed-cubing
